# hyperSpec

participates in
Google Summer of Code 2010
and is

LOOKING FOR STUDENTS

Mentor: Claudia Beleites `<cbeleites@units.it>`

hyperSpec is
· a R package for (hyper)spectral data analysis
  i.e. handles spectral images (and other spectral data) for statistical analysis
· Open Source
· written in R (a statistical programming language / software)
· actively developed
· in use since 1 ½ years
· YOUR Chance
